BACHELOR'S DEGREE IN

PSYCHOLOGY (English*)

AN INNOVATIVE, HIGHLY PRACTICAL EDUCATION TO BRING OUT THE BEST PSYCHOLOGIST IN YOU

Studying psychology at Universidad Europea in Madrid means learning your profession in a unique, interdisciplinary and fully personalized way. Because you will combine technical knowledge and practical know how, and round it out with professional competency, you will be well-prepared to become a psychology professional that can help people.

In the Bachelor's Degree in Psychology from Universidad Europea you receive a highly practical education based on addressing real clinical cases and completing more than 1,000 hours of practice starting in first year. In second year, clinical internships will take place at external centers, and therefore are conducted in Spanish. Students must reach and accredit a B2 level in Spanish before being allowed to enroll in the clinical internships.

Moreover, thanks to our pioneering methodology, you will share activities with students from other healthcare disciplines, learning how to work in multidisciplinary teams, just as you will in the professional world.

With the help of a faculty of renowned psychologists, you will develop to your full potential and specialize in the field of applied psychology that most appeals to you: Health Psychology, or Legal and Forensic Psychology.

To specialize in Health Psychology you must also complete the Master's Degree in General Health Psychology, a post-graduate degree that will allow you to practice as a Health Psychologist in Europe. If you like, you may also take this Master's degree in Spanish at Universidad Europea in Madrid.

WHY STUDY PSYCHOLOGY AT UNIVERSIDAD EUROPEA?

- Because of the practical education you will receive, based on real cases.
- Because of its interdisciplinary work-based methodology, the first of its kind in Spain.
- Because of the quality of its faculty, many of whom are active renowned psychologists.
- Because of its more than 1,000 hours of mandatory internships starting the very first year.

ADDED VALUE OF STUDYING PSYCHOLOGY AT UNIVERSIDAD EUROPEA

A PIONEERING, FULLY INNOVATIVE WORK-BASED METHODOLOGY

You will complete part of your education working in interdisciplinary teams, sharing activities with students from other health sciences departments. This is a work methodology that is the first of its kind in Spain, allowing you to learn to interact with other professionals, just as you will do in the professional world.

A HANDS-ON EDUCATION

Put into practice everything you learn in class by doing more than 1,000 hours of clinical practice throughout your degree, starting from year one. This way of working sets us apart from other universities and allows you to familiarize yourself with the professional environment and put your skills to the test from the word go.

A HIGHLY-QUALIFIED PROFESSIONAL FACULTY

Most of your professors combine teaching with their professional activity in different fields of psychology. Their experience enables them to expose you to the reality of the profession from day one, developing your competencies and abilities and providing real-life experience.

AN INTERNATIONAL EDUCATION TO TAKE YOU FURTHER

Living on a campus with students from other countries allows you to learn about their culture and their approach to psychology. And, you have the option of completing part of your education at renowned universities in more than 80 countries, thanks to our Erasmus, Garcilaso and International Laureate Network agreements.

AGREEMENTS WITH PRESTIGIOUS CENTERS AND INSTITUTIONS

Thanks to collaboration agreements in place with leading psychology centers and institutions, you will have access to internships at organizations such as Grupo 5, Psychologists Without Borders, The Professional Psychoanalysis Association of Madrid, The Bertrand Russell Psychology Center, CINTECO, The Behavior Research and Therapy Center, The Madrid Parkinson's Association, The AMMA Group, The Luria Group, The Psychology Orientation Institute, Nexo Applied Psychology, Princesa 81 Psychologists, The PSISE Clinical Development Psychology Service, and The SINEW Multilingual Therapy Institute, among others.

AN ACADEMIC MODEL FOCUSED ON YOUR PROFESSIONAL AND PERSONAL DEVELOPMENT

At Universidad Europea you will receive an exclusive education, fully tailored to your needs. Our goal is to provide you with the knowledge, competencies, and values that will allow you to develop in the best way possible for a global world.

We encourage your active participation, your commitment and your dedication so as to turn you into a great professional. From day one you will have a mentor to guide you academically and professionally and to help you develop your competencies and abilities.

Choose a teaching model renowned for the experience of its faculty, the use of educational technologies in learning, access to professional internships, extracurricular activities, and opportunities for study abroad.

Our academic model helps bring out your best version of you and enhances the value of your professional profile in the job market.

LAUREATE PROFESSIONAL ASSESSMENT (LPA). MUCH MORE THAN AN ACADEMIC TRANSCRIPT.

When you receive a holistic education that prepares you to be a more complete person and professional, such as that offered at Universidad Europea, a standard academic transcript cannot reflect the competencies and values that you gain throughout your studies.

The LPA is a certificate developed by Universidad Europea – the only one of its kind in Spain – that you receive when you complete your studies. It aims to help you stand out in the job market by documenting the superiority of your learning experience at Universidad Europea.

In addition to your academic transcript, the LPA evaluates your development of the eight most in-demand skills in today's companies, which are the central focus of our academic model: communication skills, leadership, teamwork, adaptability, initiative, problem-solving, decision-making, and planning and organization.

It also includes any value-added educational experiences that you have had, such as professional internships, study abroad, participation in social responsibility projects and language learning.

WE BELIEVE THAT EDUCATION SHOULD HELP YOU BECOME YOUR BEST VERSION OF YOU. DON'T YOU AGREE?

We're all different and we're born with a gift.
Picasso said that all children are artists...
Why should they stop?
Education tends to standardize, to rein in talent...
to penalize the risk of thinking differently.
It is time to change.

Because when you go to university, that unique gift you were born with is still there, unawakened. You still have all the potential to shine.
And this is our mission: to help you become your best version of you, knowing that everyone learns in a different way.

The rules of work have changed. Forever. We think people will work in a new way. Without borders. Your profession will be part of your life, and so enjoying your work will be essential to your happiness.

That's why we need to be a different university for each individual, to help you develop fully as a person and as a professional
So that you become your best version of you, the one that will make you shine.
